Made from fully welded 10cm dropstitch, the Half Deck 7.5 is an inflatable platform that does double-duty as a superior replacement for foam mats, which are hard on sensitive skin, less rigid, and lack long-term durability; but can also be used as a walkway, slideway, and boarding platform that connects to any Aquaglide Lakefront waterpark feature on both ends. Rigid drop-stitch construction results in a durable platform that's easy to board from the water and adds extra play surface area.
